

THE STATA JOURNAL

Articles and Columns	185
Bounding program benefits when participation is misreported: Estimation and inference with Stata.....A. Lin, D. Tommasi, and L. Zhang	185
Two-step analysis of hierarchical data.....J. Giesecke and U. Kohler	213
Fitting mixed random regret minimization models using maximum simulated likelihood.....Z. Zhu, Á. A. Gutiérrez-Vargas, and M. Vandebroek	250
First-stage analysis for instrumental-variables quantile regression.....J. Alejo, A. F. Galvao, and G. Montes-Rojas	273
Estimating Skellam distribution and regression parameters in Stata.....V. Verardi and C. Vermandele	287
Multivariate random-effects meta-analysis for sparse data using smvmeta.....C. J. Rose	301
Speaking Stata: The joy of sets: Graphical alternatives to Euler and Venn diagrams.....N. J. Cox and T. P. Morris	329
Notes and Comments	362
Stata tip 155: How to perform high-frequency event studies.....M. Kustudic and B. Niu	362
Software Updates	369
